The *Journal of Fish Diseases* is designed for the publication of scientific papers of the highest standard on all aspects of disease in wild and cultured fishes and shellfishes. It is an international journal and is devoted to the results of important research from all over the world, occasional review articles, shorter communications and book reviews. Initially, the journal will be published quarterly.

Notice to contributors The *Journal of Fish Diseases* will be free of page charges and there is no restriction on the length of papers. All contributions will be reviewed by the editors without delay and those selected for inclusion in the journal will be published as rapidly as possible. Intending contributors should submit papers or obtain further information from Dr. Ronald J. Roberts, University of Stirling, Scotland.
